1/4" Veneered Panel

TW-10827

5-3/8" x 5-3/8"
2-1/2" framing
1/4" Veneered Panel

All plywood panel designs use a 1/4" veneered, composite core panel except the TW-10522. The TW-10522 door uses a 9/16" veneered composite core panel. All panels except White Birch use a plain sliced face or half round face and rotary back veneer. White Birch uses a rotary face and back.

Due to construction complexity, all multiple panel miter doors include an additional charge of \$39.00 per middle and upright rail plus the per-panel design charge.

Framing width listed is determined by measuring across the back of the framing unless otherwise noted.

Size listed under each door represents minimum size for door. Door must exceed minimum listed by at least 3" in either width or height. Panel raise selection has an impact on actual minimum, so minimums shown are guidelines only.

Offering & Availability

All our doors are available in a wide variety of specifications to satisfy your custom needs. The information below indicates any exceptions or limitations pertaining to the designs shown on the previous page(s). For a detailed listing of particular option specifications, refer to the download indicated. These sections can be downloaded by clicking the appropriate yellow links to the right of the door images in each door category.

IMPORTANT NOTE: The images on the web site show several door designs not shown in our specifications here. Such doors are simply flat plywood panel versions of the Raised Panel Mitered door. You can either reference the Raised Panel Mitered section to review the framing cross sections and check the offering and availability table or just contact us and we can answer your questions. All that changes on the flat panel version of a mitered door is that there are no panel raise options as the panels are always flat plywood.

Woods		Maple, Cherry, Red Oak, and Hickory available. TW10 Miter available in 1" thick.
Edge Profiles	See Edge Profiles Download	TW-10 - all 3/4" and 1" profiles available. TW-10318 standard as shown, C-2, LC-2 and PRS-2 also available. TW-10827 - standard as shown, no options available. Other doors - all 3/4" profiles available.
